PRODUCT INFORMATION

Hot Melt Adhesives for Bookbinding Applications

FASTLOCK® Specialist Adhesive Products

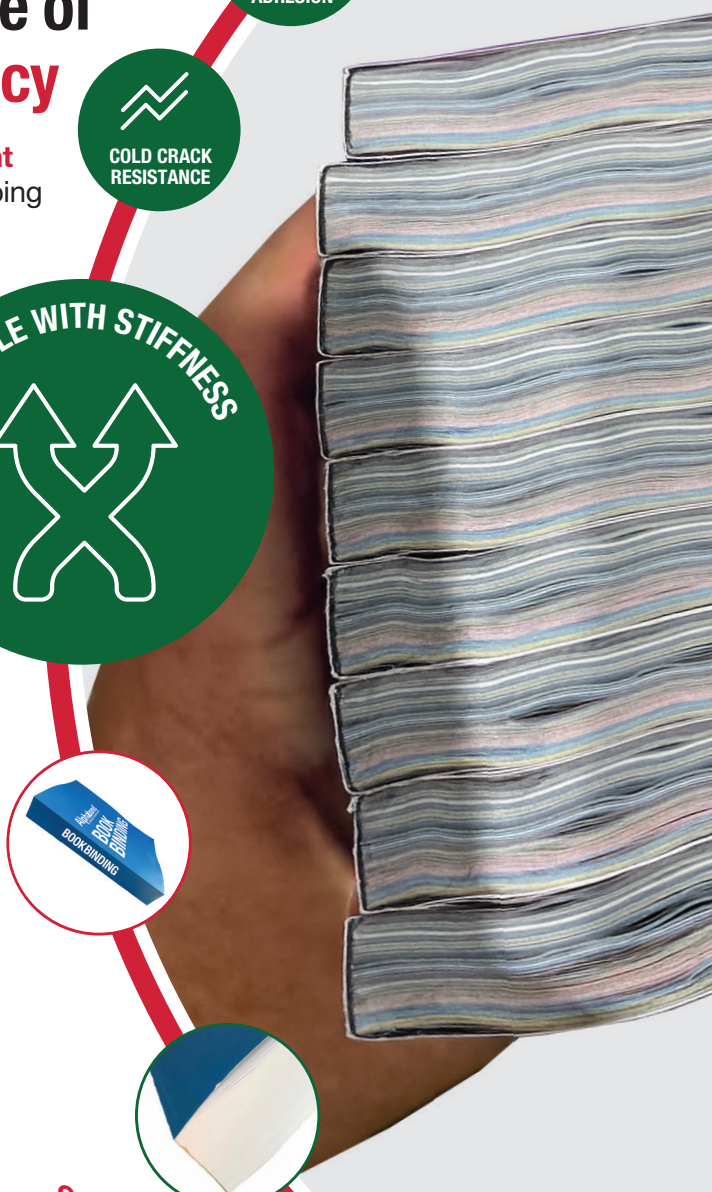

Bookbinding demands a balance of strength, flexibility, and efficiency

Our Fastlock® range has been developed to deliver **consistent performance** across both spine and side applications — helping you achieve more reliable binding while maximising mileage.

STRONG ADHESION

COLD CRACK RESISTANCE

FLEXIBLE WITH STIFFNESS

BENEFITS SPINE GLUES

Fastlock® 30079 (Yellow) & Fastlock® 30079W (White)
These two spine adhesives differ in colour, both offer:

- **High mileage:** Formulated with no filler unlike competitor grades such as Henkel 3700, meaning more books per kilo of adhesive.
- **Creep resistance:** Ensures books retain shape during storage and use.
- **Flexibility with stiffness:** Ideal for magazines while delivering a quality stiffness to book binding
- **Excellent cold crack resistance:** Performance maintained in demanding cold conditions.
- **Excellent adhesion:** Secure page binding across multiple paper and cover stocks.
- **Exceptional page pull strength:** ensuring pages stay firmly bound for the lifetime of the book.
- **One glue for all spines:** Strong grab regardless of substrate reduces the need for multiple products.

PRODUCTIVITY • PRESENTATION • PROFITABILITY • PLANET-FRIENDLY • PPPP

Talk to us about your application challenges. We offer a range of bookbinding adhesives tailored to different requirements. Contact Alphabond today to discuss the best Fastlock® grade for your process.
